SUMMARY

Software Engineer and AI/ML Developer with hands-on experience in building end-to-end data-driven systems, including machine learning pipelines, real-time analytics dashboards, and automated decision systems. Skilled in Python, backend development, APIs, and cloud deployment, with strong focus on solving real-world problems using scalable architectures.

EXPERIENCE

Mobile App Developer & Game Developer
Intern at TejasKP AI Software

May 2025 – June 2025
Vadodara, India

- Developed and maintained a scalable vehicle lubrication service mobile application named as ‘Kaushal Associates of Lubrication’, allowing users to book services, track requests, and manage service workflows through an intuitive and scalable interface.
- Designed and built a **car racing game** with realistic vehicle mechanics, track markings, collision detection, scoring systems, and interactive gameplay elements.

EDUCATION

Chandubhai S. Patel Institute of Technology (CSPIT), Charusat University *Bachelors in Technology – Computer Science and Engineering (CSE)*
CGPA – 8.67

Bright School – GSEB
Result 77%

PROJECTS

- End to End E-Commerce Churn Intelligence System** [GitHub](#) \ [Live Demo](#)
Built a production-grade ML pipeline for churn prediction using Random Forest with 92.87% accuracy and 93.82% ROC-AUC. Automated workflows using n8n for email notifications and business actions. Fully containerized using Docker and deployed on Render + Vercel.
- AI-Powered Smart ERP Platform** [GitHub](#)
Built a production-grade, AI-powered Smart ERP platform featuring a secure voice-controlled assistant, modular enterprise workflows, real-time analytics dashboards, and high-fidelity UI animations, designed for scalability, automation, and enterprise-level user experience.
- Safeguard: Smart IoT Suicide-Prevention & Emergency Response System** [GitHub](#)
Designed a life-saving IoT and mobile platform combining ESP32 sensor-driven smart fan hardware with a multi-role Flutter-Firebase application to autonomously detect high-risk situations and orchestrate real-time emergency alerts across hostel stakeholders.

TECHNICAL SKILLS

- Languages & Frameworks:** Python, React, SQL, NodeJS, Dart
- AI & Data Techniques:** Machine Learning, Data Preprocessing, Model Evaluation, Generative AI
- Platforms & Tools:** Docker, Postman, REST APIs, Git, Render, Vercel
- Software & Engineering Practices:** Agile Development, Modular Architecture, Secure Authentication, Scalable System Design
- Soft Skills:** Strategic Thinking, Cross-Functional Collaboration, Problem Solving, Agile Execution
